REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: Claims 3-24 are considered allowable since when reading the claims in light of the specification, none of the reference of record alone or in combination disclose or suggest the combination of limitations specified in the independent claims. As to claims 3-20, the prior art of record does not teach (a) a tunnel server which provides for tunneling service via an inter network, and has a global address for identifying a first end point of a tunnel provided by the tunneling service; (b) a mobile wireless system for communicating via a wireless link, and having a mobile virtual tunneling protocol client which has access to the global address for the first end point so as to enable communication with the tunnel server, the mobile wireless system being capable of being transported to a location remote from the first end point.

As to claims 21-23, the prior art of record does not teach (a) a mobile virtual tunneling protocol server which provides for a tunneling service via an inter network, and has a global address for identifying a first end point of a tunnel provided by the tunneling service; (b) a mobile wireless system for communicating via a wireless link, and having a mobile virtual tunneling protocol client which has access to the global address for the first end point so as to enable communication with the mobile virtual

tunneling protocol server, the mobile wireless system being capable of being transported to a location separated from the first end point by an inter network.

As to claim 24, the prior art of record does not teach (c) a mobile virtual private network tunneling protocol foreign agent subsystem for communication via an inter network with the mobile virtual private network tunneling protocol server and for communication via the wireless link with the mobile virtual private network tunneling protocol client of the mobile wireless mobile system to establish a mobile virtual private network tunneling protocol tunnel between the mobile virtual private network tunneling protocol client of the mobile system and the mobile virtual private network tunneling protocol server of the home network, so as to enable communication between the mobile wireless system and the home network via the wireless link and via an inter network when the mobile wireless system is at a location remote from the home network

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
